2 LEARNER INFORMATION

THE FOLLOWING TABLES PERTAIN TO LEARNERS WHO ARE REGISTERED AT THE SCHOOL THIS YEAR.

Information for learners must be for male and female learners separately, where applicable.

It is important to collect learner numbers in terms of population group and gender in order to track the extent to which equity and access are being addressed in the education system.

The learner or the learner's parents/guardians and/or family should determine population group. This should reflect the parents' and/or the families' own perception of their population group and not the racial classification used in the past.

No learner should be double-counted

NOTE: If a particular grade is NOT offered at your school/centre, place an X in the NOT APPLICABLE area for that grade. Do not enter any learner numbers or total for a grade not offered at your school/centre.

If your school/centre does offer a particular grade, but there are no learners for either the Male or Female gender, then enter 0 for the relevant gender. e.g. If your school has only Female learners in Grade R then enter 0 under the Male row in the Grade R column and the correct number of Female learners in the Female row for Grade R. Include the total
