R3 2021: NOW LIVE

data driven districts

FEATURE	DESCRIPTION	BENEFIT
Additional User Information Captured	When a user does not have an identification number on their profile, they will be encouraged to capture it upon their next login.	This will allow provincial departments to manage their DDD userbase more effectively.
Learner Chart Report Update	The term "Repeat" is replaced with the term "Not Promoted" for the parameters screen as well as the report header.	This change is to align with the Department of Education's learner categorisation.
Duplicate Learner Records Report Update	Report has been renamed to Possible Duplicate Learner Records Report and includes a new disclaimer.	This is to disclaim inference of duplicate learners.
User Login Extract Report Update	Report has the user's email removed from the report and has alternatively added user's specialisation and designation.	This further supports our efforts to ensure the security of the DDD Dashboard and to ensure the protection of personal information.
