R3 is now live with these new features

The latest release of the DDD Dashboard brings these exciting new features!

Educator Qualifications and Subject Specialisation

Curriculum Subject Advisors, Teacher Development and Planning units in districts using the Dashboard can use the educator qualifications and their subject specialisation data for their profiling and providing educator support. This data can be used to **plan more effective discussions** with the school on educator provisioning, assessing if the right educator is teaching the right classes.

- what subjects they are qualified to teach
- how long they have been trained in them
- how long they have been teaching these subjects
- what subjects are they allocated to teach in the schools they are teaching in

Number of Subjects Failed in the Learner Chart Report

The Learner Chart Report now has an additional field called “**No. SUBJECTS FAILED**” that shows the number of subjects each learner failed in the term. Educators are able to identify learners that are failing one or more subjects and begin their analysis on what the problem may be.. **This information will help districts, circuits and schools to easily identify learners which need extra support.**

Subject Performance			
Life Sciences(%)	Physical Sciences(%)	No. SUBJECTS FAILED	No. DAYS ABSENT
