REPUBLIC OF SOUTH AFRICA

ANNUAL SURVEY For Early Childhood Development (ECD) 2017

The South African Schools Act No. 84 of 1996 (section 59 [1] and [2]) states that: *Every school must supply such information about the school as is reasonably required by the Head of Education, and any person, who without just cause, fails to comply, shall be guilty of an offence.*

District:
SCHOOL/SITE NAME:

**ONLY TO BE COMPLETED BY ALL EARLY CHILDHOOD DEVELOPMENT SITES THAT ARE PROVIDING
UP TO GRADE R AND ARE REGISTERED AT THE DEPARTMENT OF EDUCATION OR ANY OTHER
GOVERNMENT AGENCY (INCLUDING PRE-PRIMARY SCHOOLS)**

ALL INFORMATION TO BE PROVIDED AS AT 01 MARCH 2017

The Annual Survey for Early Childhood Schools/Centres is the most important source of information regarding the situation at your school/centre. The information collected will contribute to the Education Management Information System (EMIS) of the province and will be of assistance in the management, administration and governance of schools, including the supply of school resources to schools/centre.

DECLARATION

I,, principal of
fully understand the provision made in the South African Schools Act No. 84 of 1996 (Section 59 (1) and (2) and Section 16A (2)(g)), which stipulates that every school must supply such information about the school as is reasonably required by the Head of Education

2 LEARNER INFORMATION

THE FOLLOWING TABLES PERTAIN TO LEARNERS WHO ARE REGISTERED AT THE SCHOOL THIS YEAR.

Information for learners must be for male and female learners separately, where applicable.

It is important to collect learner numbers in terms of population group and gender in order to track the extent to which equity and access are being addressed in the education system.

The learner or the learner's parents/guardians and/or family should determine population group. This should reflect the parents' and/or the families' own perception of their population group and not the racial classification used in the past.

No learner should be double-counted

NOTE: If a particular grade is NOT offered at your school/centre, place an X in the NOT APPLICABLE area for that grade. Do not enter any learner numbers or total for a grade not offered at your school/centre.

If your school/centre does offer a particular grade, but there are no learners for either the Male or Female gender, then enter 0 for the relevant gender. e.g. If your school has only Female learners in Grade R then enter 0 under the Male row in the Grade R column and the correct number of Female learners in the Female row for Grade R. Include the total

Pre Grade R = A programme of learning provided by school or other education institution in a grade before Grade R.

Grade R = The reception year for a learner in a school or an ECD centre, i.e. the grade immediately before Grade 1.

Attention deficit disorder with/without hyperactivity (ADHD):	ADHD refers to a chronic disorder that initially manifests in childhood and is characterized by hyperactivity, impulsivity and/or inattention. Not all of those affected by ADHD manifest all three behavioral categories. Can lead to difficulty in academic, emotional, and social functioning. May be associated with other neurological, significant behavioral, and/or developmental/ learning disabilities.
Autistic spectrum disorders:	Autistic spectrum disorders impact the normal development of the brain in the areas of social interaction and communication skills. Children typically have difficulties in verbal and non-verbal communication, social interactions, and leisure or play activities, find it hard to communicate with others and relate to the outside world. - A medical practitioner, preferably a specialist (paediatrician or psychiatrist) must diagnose learners.
Behavioural / conduct disorder (including Severe behavioural problems):	Learners with behaviour / conduct disorder usually have little concern for others and repeatedly violate the basic rights of others and the rules of society. Children and adolescents act out their feelings or impulses in destructive ways. Offences often grow more serious over time. Such offences may include lying, theft, aggression, truancy, the setting of fires, and vandalism.
Blindness:	Loss of useful sight. Blindness can be temporary or permanent. Damage to any portion of the eye, the optic nerve, or the area of the brain responsible for vision can lead to blindness. <3/60 in the better eye, after maximum correction.
Cerebral palsy:	Cerebral palsy describes a group of chronic conditions affecting body movements and muscle coordination. Caused by damage to one or more specific areas of the brain, either traumatic, infectious, or developmental. Major types include spastic, dystonic, athetoid and ataxic and they can be quadriplegic, diplegic or hemiplegic. A medical practitioner must make the diagnosis.
Deafness:	Learners who experience a <u>severe</u> hearing impairment and who depend on specialized educational support. Hearing must be assessed through an auditory test and the hearing loss should be more than 61 dB at 0,5; 1; 2 and 4KHz in the better ear
Deaf-blindness:	Deaf-blindness means concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational needs different from children with deafness or children with blindness.
Epilepsy:	Disorder caused by the sudden over activity of brain cells and characterized by repetitive attacks of a diverse nature. Seizures (or convulsions) occur when there is abnormal electrical discharge in the brain. This may be triggered by chemical imbalance or a structural abnormality. Seizures differ in cause, nature, severity, management and long term effect.
Hard of hearing:	Learners who experience a moderate hearing impairment and who are in need of additional specialized support. Hearing must be assessed through an auditory test and the decibel loss must be more than 31dB for persons under the age of 15 and more than 41dB for persons 15 years and older
Mild to moderate intellectual disability:	Learners with an intellectual disability have significantly lower than average intellectual ability and deficits in social and adaptive functioning, that is, limitations in such areas as communication, social, daily living or movement skills. Learners with mild to moderate intellectual disability are academically functioning on level below 75% of that of their peers. (See moderate to severe intellectual disability below) IQ tests are no longer considered appropriate.
Severe to profound intellectual disability:	Learners with to severe to profound intellectual disability are academically functioning on a level below 50% of that of their peers. Some identifiable causes include: hereditary factors; chromosome abnormalities; brain damage before or at birth; brain damage after birth due to illness or accident; malnutrition or other deprivation in early childhood.
Partial sightedness / Low Vision:	Low vision is impairment of visual functioning even after treatment, for example an operation and/or standard refractive correction (has been given glasses or lenses) and has a visual acuity of less than 6/18 to light perception, or a visual field of less
Physical disability:	Learners with a significant physical disability that substantially limits one or more basic physical activities, such as walking, climbing stairs, reaching, lifting, or carrying.
Specific learning disability:	A specific learning disability is a disorder in one or more of the central nervous system processes involved in perceiving, understanding and/or using concepts through verbal (spoken or written) language or nonverbal means.
Psychiatric disorder:	These disorders must be diagnosed by a psychiatrist or psychologist and could include: Personality disorders: Mental illnesses that share several unique qualities. While many disorders vacillate in terms of symptom presence and intensity, personality disorders typically remain relatively constant. Adjustment disorders: Disorders in this category relate to a <u>significantly</u> more difficult adjustment to a life situation than would normally be expected considering the circumstances. Mood disorders: These include those disorders where the primary symptom is a disturbance in mood. In other words, inappropriate, exaggerated, or limited range of feelings, e.g. bipolar disorder, major depression disorder, etc. Anxiety disorders: The primary feature is abnormal or inappropriate anxiety such as Acute Stress Disorder, Obsessive-Compulsive disorder, Phobias, Posttraumatic Stress Disorder, etc. Psychotic disorders: The major symptom of these disorders is psychosis, or delusions and hallucinations. Delusions are false beliefs that significantly hinder a person's ability to function, e.g. schizophrenia

VERIFICATION AND CLEARANCE SECTION

The purpose of this clearance document is for the verification and authentication of the information declared by the site on the survey form.

The form is to be completed in full and verified by the Principal or Deputy Principal (or another designated person) at the site. The principal must sign and stamp the provided space at the bottom of the verification form to confirm that the checking of the survey data has taken place and that all mistakes have been rectified per item on the form. This verification form should be submitted to the district/ regional offices and a copy should be filed at the site for audit purposes.

Once the form is received from a site at the district or regional office, the designated Provincial Education Manager must verify the data in each item on the form. The Provincial Education Manager must sign and stamp the provided space at the bottom of the verification form to confirm that the checking of the survey data has taken place and that all mistakes have been rectified.
